

SECRET
GIANT REACH Vehicles are extremely sensitive.
They can be detected from great distances.
Infrared, ultraviolet, and convection
cameras can detect them at distances up to
10 times greater than the properties of normal
intelligence publications which
are vehicles themselves or 10-20 SEC. intervals
and
ELECTRONIC
Large areas of land can be
detected by electronic means.
This is a new technique.
It is very effective.
It is very reliable.
It is very accurate.
It is very inexpensive.
